

PCS P-TECH Academies (Assessment Strategy)

PCS P-TECH Academy students will have three opportunities throughout the academic year to pass the TSI reading, writing, and math assessments. Students will be given a practice assessment. Based upon the practice test results, the student receives an individualized action plan. Students will work with an individual FEV Tutor to remediate areas of difficulty and refine areas of strength. Once a student has successfully passed the respective practice exam he or she will be permitted to sign up for the TSI at their respective testing center.
